

Academic Indicators Distance from Met or Distance from Level 3

This is the only state indicator that is not a percentage or rate. It is an average. Each student in grades 3-8, who was continuously enrolled that year earned a scale score. The distance of each scale score from the level 3 threshold score for the grade level is calculated as above or below the level 3. Those scores are then averaged to determine an average for the LEA, school, or group.
