

THE SMARTER BALANCED ASSESSMENT CONSORTIUM provides two types of interim assessments as part of a balanced assessment system. Teachers can use the interim assessments at strategic points during the year to gauge student progress, to gain information to inform instruction, and to provide students with valuable feedback on their learning goals and process. Learn more about the structure and use of these free tools and leave prepared to share this information with others at your site.

In this workshop, we will:

- Examine the two different options for interim assessments: Interim Comprehensive Assessment and Interim Assessment Blocks and discuss potential uses for each type.
- View the availability of interim assessments for both ELA and Math by grade level and by topic and become familiar with their time and scoring requirements.
- Learn to navigate the CAASPP site for administering the interim assessments and accessing the results, as well as the CDE site for additional resources on the assessments.
- Experience the learning for both, teachers and students by participating in the hand-scoring process of an interim performance task.
- Consider the role of the interim assessments in your overall assessment system and as a tool for collaboration.

SBAC Interim Assessments

Formative assessment to measure student progress and inform instruction
