

# Using Mathematics Performance Tasks for Instruction and Assessment

Raise the rigor and complexity of your mathematics instruction beyond procedures and concepts through the use of performance tasks.

Teachers will:

- Explore the key student abilities included in the Smarter Balanced claims #2-4: Problem solving, Communicating Reasoning, and Data Analysis and Modeling
- Consider ways to incorporate performance tasks as a part of core curriculum on a regular basis
- Determine grade-level appropriate performance tasks from various sources
- Learn to write grade-level performance tasks aligned with the Smarter Balance Performance Task Specifications

Register online at
