

DR. VALERIE HENRY, a National Board Certified and award-winning teacher, is currently a faculty member at University of California, Irvine where she teaches mathematics education courses for undergraduate, credential and graduate students. Dr. Henry's research with primary fact fluency in California has earned her national recognition. Her extensive classroom experience, knowledge and personality make her a favorite among classroom teachers.

SANTA BARBARA
County Education Office
Susan C. Salcido, Superintendent

factswise

with Valerie Henry, Ed.D.; NBCT

The development of the Common Core State Standards for Mathematics began with research-based learning progressions detailing the cognitive development of number and operations in primary grades. Dr. Henry's FactsWise program is built on the same research.

Participants will learn how to build students' fact fluency and set the foundation for learning CCSS mathematics. This program is research-based and has proven results in our county schools.
